

**Table 2. Pharmacokinetics**

	<b>Hetastarch LEI</b>	<b>Hetastarch NaCl</b>	<b>Albumin</b>
<b>Onset of volume expansion</b>	Within 30 minutes	Within 30 minutes	Within 15-30 minutes
<b>Duration</b>	Expansion decreases over 24-36 hours	Expansion decreases over 24-36 hours	24 hours
<b>Renal elimination</b>	33% of dose within 24 hours	46% of dose within 48 hours	None
<b>Metabolism</b>	Enzymatic degradation for large molecules	Enzymatic degradation for large molecules	Hepatically
<b>Dose adjustment</b>	Renal impairment	Renal impairment	Possibly in renal impairment
